Ability to work in a team

Communication Skills

Team leadership

Professional Summary

Highly skilled in both front-end and back-end development, competent at designing scalable and performant systems. Proven ability to translate designs into clean, maintainable code using ReactJS, Node.js, SpringBoot, and various UI/UX frameworks. Extensive experience collaborating with cross-functional teams to define architecture standards, deliver user-facing features, and implement robust software solutions across various industries. Possesses a strong understanding of algorithms, design patterns, and testing methodologies. Eager to apply experience in a fast-paced atmosphere and contribute to a company developing unique goods.

Employment History

Full stack Developer, Shippex Enterprise CO, LTD, Cairo

01/2024 - 03/2024

- Build and maintain user interfaces (UIs) for the shipping company website using ReactJS, Redux and NextJS.
- Develop interactive and responsive web pages using HTML, CSS, and a UI component library like MUI.
- Implement features for functionalities like shipment tracking, quote generation, and account management, and ensure website accessibility and a positive user experience across different devices.
- Collaborate with designers and back-end developers to translate designs into functional web applications. Participate in code reviews and identify potential issues early in the development process.

Business Yield Consults

06/2023 - 10/2023

- Collaborated with cross-functional teams to design and implement user-friendly interfaces, resulting in improved user experience and increased customer satisfaction.
- Developed and maintained frontend applications for Business Yield Consults using TypeScript, and React.
- Leverage Material UI (MUI) for pre-built React components and a consistent design language. Integrate HTML and CSS to structure and style the application's frontend
- Write code that adapts seamlessly to different screen sizes and devices, engage effectively in all stages of the development lifecycle, from planning and development to testing and deployment.
- Continuously learn and adapt to keep abreast of new developments in ReactJS, NextJS, and other relevant technologies.

Backend Developer, Jiggle, Uyo

09/2022 - 01/2023

- Design, develop, and maintain robust and scalable backend services using JavaScript, Express and Nodejs. Implement APIs (Application Programming Interfaces) for product management, customer accounts, shopping carts, order processing, and payment integration.
- Design and build database schema using MySQL
- Secure API endpoints using authentication and authorization mechanisms and handle sensitive data securely (e.g., user passwords, payment details)
- Design and deploy backend services on Cloud hosting

Fullstack Developer, Start Innovation hub (Internship), Uyo

03/2021 - 01/2022

- Build user interfaces (UI) using ReactJS, a JavaScript library for creating interactive web applications.

- Develop secure and scalable APIs using SpringBoot, a popular Java framework for building web applications, connect the back end to databases and manage data persistence and implement authentication and authorization mechanisms for user access.
- Collaborate with designers to translate design mockups into functional UIs. Contribute to technical documentation for future development
- Stay up-to-date with the latest advancements in fintech technologies and security best practices.

Education

National Diploma (ND), Akanu Ibiam Federal Polytechnic, Uwana

02/2019 - 05/2021

Higher National Diploma, Federal Polytechnic OKO, Awka

04/2022 - 12/2023
